SUMMARY

Software Engineer with 2+ years of experience specializing in full-stack development, automation solutions, and cloud deployment. Proficient in Python, Node.js, React.js, Next.js, with expertise in building scalable systems.

SKILLS

Technologies	Python, PHP, Node.js, React.js, Next.js, FastAPI, MySQL, MongoDB, Postgresql
Tools	AWS (EC2, Lambda, S3), RESTful APIs, Web/OS Automation

EXPERIENCE

Developer (Contract)	Oct 2025 - Present
ThemeSoftwares	<i>Remote</i>

- Deliver custom automation solutions and user-friendly interfaces for diverse client requirements.
- Build scalable backend with Flask, FastAPI, and Node.js to provide intuitive interfaces for automation tools.
- Deploy and manage automation systems on AWS EC2, optimizing cost through AWS Lambda.

Software Engineer II	Aug 2024 - Dec 2025
Roomy Technologies	<i>Islamabad, Pakistan</i>

- Enhanced ChowPOS system, delivering feature updates based on business requirements.
- Implemented Kitchen Display System (KDS) with real-time order synchronization restaurant operations.
- Architected comprehensive online ordering platform integrated with ChowPOS, supporting delivery, takeaway, and dine-in with QR-based ordering and payment for dine-in customers.

Python Developer	Sep 2023 - Aug 2024
Logixsy Technologies	<i>Islamabad, Pakistan</i>

- Developed QR-based attendance system using Python and React.js with admin/user dashboards, improving employee management and work-life balance.
- Maintained and enhanced RFID asset tracking system backend in Python, optimizing existing codebase.
- Led web/OS automation team, delivering automated data extraction solutions for diverse business use cases.
- Deployed automation solutions on AWS EC2, ensuring high availability and performance optimization.

PROJECTS

MindPad (Notes App): Developed a full-stack note management application featuring secure user authentication with JWT and efficient state management using Redux. Enabled note categorization and organization with a responsive React.js frontend and a scalable Node.js + MongoDB backend. Deployed the application on AWS for reliable cloud performance.

ChowPOS Online Ordering: End-to-end online ordering platform with POS integration supporting delivery, takeaway, and dine-in. Implemented QR-based ordering and payment for dine-in, integrated with PayFast and Easypaisa gateways. Deployed on AWS EC2. Technologies: PHP, React.js, MySQL

QR Attendance System: Employee attendance management with QR check-in/check-out, admin dashboard, and analytics. Backend: Python, Frontend: React.js, Database: MySQL

EDUCATION

Bachelor of Electrical Engineering, NUST University	2019 - 2023
